Fix a Leak Week

EVERY DROP COUNTS

Did you know that an American home can waste, on average, more than 11,000 gallons of water every year due to running toilets, dripping faucets, and other household leaks?

Nationwide, more than 1 trillion gallons of water leak from U.S. homes each year. That's why WaterSense reminds Americans to check their plumbing fixtures and irrigation systems each year during Fix a Leak Week.

Pledge to be for water during Fix a Leak Week. It's as easy as 1-2-3

- 1 **Check** toilets for silent leaks by putting a few drops of food coloring in the tank and seeing if the color appears in the bowl before you flush. Don't forget to check irrigation systems and spigots, too.
- 2 **Twist** and tighten pipe connections. To save even more water without a noticeable difference in flow, twist in a WaterSense labeled faucet aerator or showerhead.
- 3 **Replace** the fixture if necessary. Look for the WaterSense label when replacing plumbing fixtures, which signifies the product has been certified to save water and perform well.

How Much Water Do We Use?

Here, there, and everywhere:

Fix a Leak: Small household leaks can add up to gallons of water lost every day. That's why WaterSense reminds Americans to check their plumbing fixtures and irrigation systems each year in March during Fix a Leak Week.

In the bathroom—where over half of all water use inside a home takes place:

- Turn off the tap while shaving or brushing teeth.
- Showers use less water than baths, as long as you keep an eye on how long you've been lathering up!
